It's the holiday season, and you want the best system for playing your games and handling next-generation hardware. After the disaster that was 20 March 2020, we thought we'd take a look at what the world has to offer at this time of year. This has narrowed down to two models: the new Nvidia RTX 2060 Super graphics card and an Intel Core i3 8th Gen with integrated G-Sync. In my mind, one is the

Kisumu is a free, Open-Source, offline audio editor & organizer that is extremely easy to use. Mixes virtually any kind of media such as mp3, cd . The present invention is directed to a gas turbine combustor which provides combustion of a mixture of fuel and air in a combustion chamber. Referring to FIGS. 10 through 11B, FIG. 10 is a partial sectional view of a gas turbine combustor 100 of the prior art, and FIGS. 11A, 11B, 12A, 12B, and 12C are partial sectional views along the lines XI-XI, XII-XII, and XIII-XIII in FIG. 10, respectively, and arrows in these figures represent directions of flow of fluid (gasses or fluids) at the indicated points. In gas turbine combustors of the prior art, such as the combustor shown in FIG. 10, the mixture of fuel and air is thoroughly mixed by the use of high-temperature gas discharged from a combustor 10 so that the flame is burned on the surface of a lean mixture in the interior of the combustion chamber, and then, a mixture gas having a stoichiometric air-fuel ratio is supplied to a diffusion burner 13. The mixture gas is mixed with the high-temperature gas, and accordingly, the temperature thereof increases. Accordingly, the

prior art requires the use of a so-called thermal limiter 14 for suppressing the increase in the temperature of the lean mixture to a certain degree so as to prevent the combustion of the mixture from being damaged due to an excessive temperature increase, and the like. The thermal limiter 14 is required to withstand a very high temperature. Consequently, the structure of the thermal limiter 14 is complicated, and the manufacturing cost is increased. In addition, there is a problem in that a pressure loss of the fluid increases because of restriction by the thermal limiter 14. Also, because the combustion must be performed at a stoichiometric air-fuel ratio or less, there is a problem in that it is difficult to increase the fuel efficiency of the gas turbine. iTunes I just got a little ditty about buying music for 7.00 a song.
