**of Misfit Toys The battle of the extraneous has been continuing since 1982 when the natural sculpted beauty was introduced to the movie industry. Since then, the battle has been a fixed topic. Many times, the extraneous has been an ingredient. At other times, the filmmaker considers the background of his environment before embarking on a production. Not as**

infrequent as one would expect, the extraneous has often been deemed a blemish. In some cases, only the public knows the blemish. Only in a few cases has anyone bothered to explain the blemish and why a blemish it was, or might be. Rex (executive produced by Lucy Liu and Lori McCreary), from author William Blake (Lilting), is one of the very few films to successfully deal with its extraneous. From the right hand side of director Thomas Crialese, the film has brilliantly demonstrated the value of what has been a bad or blemished part. Readers of FANDOM may remember the epilogue of Lilting in which William (Kevin Spacey) is returning home from taking his wife, his son and daughter, his friend and his lover home to meet his parents. This is, for a moment, a normal American family. Nor am I stating or suggesting a correlation between this representation and the one coming out this week, Mary and Max. William's parents, however, live on an island, a children's only island. This is Rex. In 1985, when Lilting came out in the states, it caused quite a stir. Its worth was undeniable, but was it moral? Was William an irresponsible absentee father? But what in itself was Rex? The island itself is a collection of nearly-children, the childlike missing a lot of the necessities of normal social life, all purely to make the childlike figure-filled landscape a living breathing place. The young of the world wander amidst their naked nature. They hear no greater scale than the local musical movement. And according to the director, Crialese, they are emotionally all right. But they all have a relationship with the adult. They are welcome all over the place. The only human contact they have is with the adult. Children on the outside. (This was, I think, William's excuse for being away from the conventional family, past and present.) In 1997, Lilting was
