According to Autodesk, AutoCAD is "one of the most popular commercial computer-aided design (CAD) and drafting software applications". AutoCAD is also the fastest-growing commercial CAD software. With more than 14 million installed users, Autodesk says that AutoCAD was "accelerating more than any other category of software". AutoCAD costs around US\$1500. According to the 2019 WACoS report on the financial performance of software businesses (PDF), Autodesk achieved the most gains in market share, revenue and operating profit between 2014 and 2018, in what was a relatively weak CAD software industry. WACoS's ranking of the top 10 software companies in the CAD industry in 2018 indicated that Autodesk was in a very strong position to increase its market share further in 2019, while other companies in the top 10 had experienced sharp declines in their market share. History Autodesk V-Ray for AutoCAD is an add-on product that allows users to render and create realistic 3D images in AutoCAD, utilizing V-Ray for 3D modelers. Autodesk developed AutoCAD R14 and integrated V-Ray into the software in May 2007. V-Ray was made available to AutoCAD customers for the first time. V-Ray, introduced in 2008, is an open-source (non-commercial) application for rendering using ray tracing. On April 29, 2010, Autodesk released AutoCAD LT 2009 SP1, with integrated V-Ray. With this release, Autodesk increased the price of its V-Ray license from \$99 to \$199 per user and limited the number of V-Ray licenses that could be downloaded and used per license agreement. Autodesk discontinued V-Ray as a standalone product in April 2011. On March 29, 2013, Autodesk announced that V-Ray 2.0 was released as a free download for the current version of AutoCAD (2010, 2011, 2012 and 2013 releases). V-Ray 2.0.3 became available for AutoCAD 2013 on May 30, 2013. On May 31, 2014, Autodesk announced V-Ray for AutoCAD 2014, the newest version of V-Ray integrated in AutoCAD 2014. AutoCAD 2016 and 2017 releases include V-Ray, a free product that supports all of AutoCAD's rendering tools
