Psiavari Psiavari (Greek: Ψιβαρι) or Psiavri is a town in the northern part of Phthiotis in central Greece, forming a municipal unit with the town of Nymfatares (Nymfataresioi). It was built and is named after the Greek wind god Aeolus. Psiavari is located near the northern end of the Drapetsos mountain. It is 13 km north of Larissa. The town has a long history, starting as a Mycenaean outpost of the Pylos-Pythagoras-Grammenus network. The town's original name was Agia Paraskevi (Ἁγία Παρασκευή), but it was renamed after Aeolus, the god of the wind. It was heavily fortified. In the 13th century, it was captured by Michael Palaiologos, and it was a fortress under the Palaiologos dynasty until the Greek War of Independence. In the 19th century, it was occupied by a Turkish force which destroyed the fortifications. Psiavari is a notable tourist destination because of the Church of St. Paraskevi, a Greek Orthodox church. It is currently one of the most picturesque towns in the Phthiotis. The name of the town means "sheltered" in Greek. History In 1199, during the Fourth Crusade, Psiavari was conquered by the forces of Alexios III Angelos and his brother Andronikos, princes of the Despotate of Epirus. The Normans had taken much of Phthiotis by then, and the princes of Epirus took this opportunity to drive them out. But their victory was short-lived. Some Latin documents record that in 1213, during the Latin domination of the Morea, the inhabitants of Psiavari were massacred by the army of the Despotate of Epirus led by the future Greek Emperor Michael VIII Palaiologos. This event is commemorated by the year 1213 in the Greek calendar. In 1488, under the terms of the Treaty of Adrianople, the Venetians were given possession of Phthiotis. This did not last long, however, and in 1493 the Phthiotis forces, led by the Greek general Demetrios Pandermatos, drove the Venetians out and united
