If you are not from Apple and you bought an iPhone directly from the Apple store, you have to make sure it is activated on Apple devices or it wont be recognized by the iPhone X. If you bought an iPhone from non-Apple online store, you can activate it. (However, if you forgot the email and IMEI, you can contact us for the IMEI number of the phone and we can send you the email to reset your password). My advice is always use an iPhone factory reset. There are still several things you need to do before resetting. Step 1: Check your IMEI number on your screen by pressing and holding Home + Power buttons at the same time. Hello I would like to contact the privacy team and also disclose that I have a currently used and working iPhone 5s which has the new icloud. Privacy to your company. Is it on our side to be able to connect to and use the devices. I have files on it, I would like to sync them on to a computer. As if it wasn't bad enough to not have a backup, this whole experience has taken all of the fun out of my iPhone. I know that if I restore it with iTunes the data on it will be lost, and I'm not really willing to have that happen. Is there a way to hack my iPhone without restoring it? I want to let people know about a problem that I am having with my iPhone. I can see my iphone from my other IOS devices and I can see most of the files, apps, and documents on it. I can see the photos and videos but can't view the videos. I tried to look up how to do this online and also tried to take pictures of the videos on my iphone but only my android device reads it. I am not sure if it will help but I thought maybe you guys might know.

As we mentioned above, the tools listed on our website are a result of some great time spent by some hardworking people to provide you the best in the industry. So, it's your turn to help them by sharing your needs and suggestions. Make use of all the tools listed on our website to protect your device from being lost or stolen. Apple is one of the most prominent iPhone brands in the market. However, this iPhone is widely considered as the most secure one. All the users can keep a record of the important information, such as contacts, messages, data, music, photos and videos, on the device. But unfortunately, due to some issue you have to set a passcode on your iPhone and make it inaccessible for the data stored in it. Still, you can get the information back with the help of data recovery tools. With the help of iPhone Password Unlock software, you can reset the passcode and even its corresponding pattern. One of the features of the iPhone is that it can support either a 4-digit pin or a 6-digit PIN. Moreover, this phone can be unlocked with Face ID, Fingerprint, or the Screen Passcode. In case, if you have forgotten your passcode, you are capable of unlocking your device with the help of the Phone Unlock software. If you need to resets your iPhone for any reason and this involves the device being locked again, then you can follow the below-mentioned guide that will help you get into your phone without any problem.
