I want to remove everything between the ")" and "(" but I can't figure out how to. The file has no structure and I have to do this in one fell swoop. I can't do anything one by one because it will take ages. I've tried the regular expression Find > Replace (Find what:)(\), but this deletes everything between the first and second) and (). How can I do this? A: Open the search and replace dialog with Ctrl+H. Click on "Regular expression" and put this in the Find what box: (\\[^\"])* Put the following in the Replace with box: Leave the first and last instances of) and (respectively. Put *) in between each set of square brackets to match one or more 2edc1e01e8
