The Bat! to Outlook Transfer 2.0.0.0 - The program's all-in-one component that allows you to migrate The Bat! emails in one click. The software is fully compatible with Outlook 2010, 7 and earlier. To obtain the compatibility with the newer versions of the program, you need to upgrade. It has a well-arranged interface with a number of important options that enable you to: - export MBOX to PST. - export MBOX to MSG. - rename and convert a folder. - Import data from an MBOX file into your Outlook. - export MBOX to HTML. - split an attachment. - delete an attachment. - create a new group. - create an email report. - select options for exporting. The software is fully compatible with Outlook 2010, 7 and earlier. To obtain the compatibility with the newer versions of the program, you need to upgrade. Elegant, intuitive and easy to use For anyone who is looking for an easy-to-use solution that allows you to move The Bat! emails in one click, then the application will come in handy. The program is packed with a number of useful features that you can use to migrate your MBOX to Outlook. All you need to do is to specify the type of conversion that you want, select the folder to convert, and then click on the button that can either save the messages to Outlook or PST. The program is so easy to use, it will take you just a few clicks to convert your MBOX emails into PST. *Bat! 2.0 is the first major release in which the core of the conversion has been re-written. From version 2.0 we've upgraded the structure of the library, the main challenge being to implement a new version of the conversion algorithm. The new algorithm is much faster, allowing us to improve overall conversion speed and quality. *MessagePad 4.1.1 (the free version) is already the best message conversion app on the market. Version 4.1.1 adds a handy new function for The Bat! users: the ability to convert multiple MBOX files into one larger PST file. You can do this easily with the new batch conversion feature. You

What's New In The Bat! To Outlook Transfer?

The Bat! to Outlook Transfer is a user-friendly application that enables you to migrate your messages to Microsoft's email client without having to worry about encoding, proper conversion and data transfer. Straightforward setup and well-organized interface The installation is as simple as it gets and it entails following the regular steps. You should know that the application can support both x86 and x64 versions of Outlook and hence, you need to make sure you are running the one that corresponds to your email client, as otherwise you might get some errors while attempting to do the transfer. The program comes with a clean and structured interface that consists of 2 main panels, namely one where you can preview the files and folders that contain the Outlook emails and another that acts as the log. As you probably already guessed, you can specify details about the app's functioning mode and various parameters from the menus. Enables you to migrate emails in 3 easy steps In terms of functionality, the utility allows you to seamlessly transfer all The Bat! messages to your Outbox Inbox in just a few steps. To be more precise, first you can select the source folder or the directory where you keep your MBOX files. On a side note, this can also be a network or card drive, as the application can read external drives as well. At the same time, you can choose the exact files or folders that you want to process. Afterwards, you can select the conversion option, a step that you can skip as well and access the button that can either save the messages to Outlook or PST. Depending on how many files you want to migrate, the entire operation might take some time. It is necessary to mention that you can preview the progress along with any potential errors that occur during the transfer in the dedicated log area. A proficient utility for email transfer In the eventuality that you have been working with The Bat! previously and you decided to transfer your email client to Outlook, then the application can help you migrate all the important messages without any fear of data loss.
