Hi ZZ – It's definitely possible to have smarter previews enabled in LR 5 & 5.1 but it will use up more RAM and CPU. The LR product team is considering the pros/cons of using the defaults and if it makes sense to have it enabled. Hi Richard, the Smart Previews are in the Alt/Optimized Settings. So you have these on. However, from my experience, and others I've seen and read, these can take up up to twice the RAM as compared to the "lazy" previews. The smarter previews are enabled whenever you take a picture (expose them), press the shutter button. I would not choose this setting and would opt for a slower optimization of pictures that were not quick to expose.
