What I mean by "best" is Photoshop CC 2019 is a better version of Photoshop CC 2017 for the average use case. As to Photoshop CS6, I'm not surprised that you didn't like it, but it's up there. Or, at least, up there with early versions of CC in terms of new features that makes them easy to use, as well as the fact that it doesn't try to keep up with some of Apple's more recent releases, such as their video editing. I do most of my work in either Photoshop or Lightroom, depending on what my goals are that day. I recently moved to CC and it's been pretty solid for me. As far as I'm concerned the rapid release cycle of CC makes it something of a no-brainer. If 5.2 is slow, CS6 is the kind of thing that will break the workflow.

In January 2018, users got a vague explanation of what the app is, but that explanation hasn't improved in 18 months.
